Fullstack Developer | Python / Django / FastAPI/ Node.js / React / Vue

Summary

Full-Stack Developer with a solid foundation in Python/Django, FastAPI, Node.js, React, and Vue.js. Currently contributing to PhrasIQ, an AI-focused platform. Experienced in designing and deploying modern applications using Docker, CI/CD (GitHub Actions), and Caddy/NGINX. Proven ability to turn concepts into polished products with clean code and engaging UI.

Experience

Founding Full-Stack Engineer – PhrasIQ
May 2025 – Present

- Collaborating with the team to build scalable, high-performance systems, utilizing technologies such as React, Next.JS, Tailwind CSS, Redux, FastAPI and PostgreSQL.
- Engaging in the design and implementation of features that enhance data processing, model fine-tuning, and decision intelligence capabilities.
- Participating in cross-functional discussions to align technical solutions with business objectives and user needs

Full-Stack Developer – Freelance / Personal Project
Jan 2024 – April 2025

- Designed, developed, and deployed fullstack web applications for clients and personal projects using Python/Django, Node.js/Express, PostgreSQL, MongoDB, and React/Vue.js.
- Consulted on deployment pipelines, static hosting, and frontend/backend integration

Django Developer – Ergon Agile
Jul 2022 – Dec 2023

- Developed a Django-based **Kiosk application** with a core feature to capture guest images using JavaScript webcam integration. Serialized image data and stored it alongside user metadata via Django models
- Contributed to the backend logic, database modelling, and REST API development for user interaction and data handling
- Collaborated in an Agile environment using Git for version control, feature branching, and team collaboration.

Skills / Tech Stack

Languages

Python, JavaScript (ES6+), HTML, CSS, SQL

Frameworks & Libraries

Django, FastAPI, Node.js, Express.js, React, Vue.js, Tailwind CSS, Bootstrap

Databases

PostgreSQL, MongoDB, Firebase Firestore

Tools & Platforms

Docker, GitHub Actions, Caddy, NGINX, DigitalOcean, Git, VS Code

Others

Firebase Auth, Cloudinary, JSON Server, REST APIs, CI/CD pipelines

Personal Projects

Portfolio Website — [Link](#)

Vue.js, Firebase, Cloudinary, Tailwind CSS, GitHub Actions, Docker, Caddy.

Personal website showcasing full-stack projects, deployed via CI/CD on DigitalOcean and reverse proxied with Caddy.

Randomdots — [Link](#)

Node.js, Express, MongoDB, Cloudinary, Docker, Caddy.

Social discovery web app, Geocoding, with secure Docker deployment and custom domain.

Taekwondo Coach — [Link](#)

Django, PostgreSQL, NGINX, GitHub Actions, Docker Compose.

Media-rich platform with dev/prod workflows, CI/CD, and Caddy reverse proxy.

Planetwander — [Link](#)

React (Vite), JSON Server, Docker Compose. Frontend + backend split app deployed under subpath using Caddy.

Fullstack Pizza — [Link](#)

Static HTML/CSS

Fully static site showcasing frontend styling and component work.

Additional Info

Actively contributing to PhrasIQ while continuing to learn and practice new technologies with a focus on deepening fullstack and DevOps expertise.

Education

Sekolah Tinggi Teknologi Indonesia
Bachelor of Science in Information Technology
